PROFESSIONAL SUMMARY

Computer Science fresher focused on Generative AI and RAG application development.
Built projects using Python, embeddings, vector retrieval, ChromaDB, and local Ollama LLM inference.
Additional experience includes natural-language-to-SQL workflows, SQLite query execution, and structured AI automation.
Seeking an entry-level role applying truthful project experience to retrieval and LLM engineering workflows.

SKILLS

Programming: Python, SQL
Libraries / Frameworks: Pandas, NumPy, Scikit-learn, Streamlit
AI / Machine Learning: RAG, Embeddings, Generative AI, Ollama
Databases: SQLite, SQL, ChromaDB
Tools / Platforms: Git, GitHub

PROJECTS

Student Performance RAG Chatbot

- Built a local RAG chatbot over 6,607 student records using preprocessing and searchable student profiles.
- Generated embeddings, stored 6,607 student documents in ChromaDB, and performed semantic retrieval.
- Integrated Ollama with llama3.2:3b and used Langfuse tracing, Promptfoo evaluation, and Pytest testing.

Text-to-SQL Project

- Built a Python workflow that converts natural-language questions into SQLite-compatible SQL queries.
- Integrated a Gemini REST API with an OpenAI-compatible fallback and executed generated SQL against a customers/orders database.
- Implemented structured API payloads, code-fence removal, first-statement handling, and query-result return.

AI Resume-JD Match Tool

- Built an n8n workflow for AI-assisted comparison of candidate resumes and job descriptions.
- Accepted resume-file uploads and job-description input, producing structured skill and requirement matching output.
- Applied Generative AI and workflow automation to resume/JD analysis.

EDUCATION

Bharath Institute of Higher Education and Research — B.Tech — Computer Science and Engineering (2022–2026); CGPA: 7.94
Harvest Public School — Class XII — CBSE (2022); 70.8%
Harvest Public School — Class X — CBSE (2020); 82.2%

CERTIFICATIONS

Artificial Intelligence Internship — Ediglobe (February 2024)
AI-ML Virtual Internship — EduSkills (March 2025)
TCS iON Career Edge – Young Professional — TCS iON (March 2025)
Introduction to Internet of Things — NPTEL (April 2025)
