## PROFESSIONAL SUMMARY

---

Computer Science fresher focused on machine learning, with hands-on experience in Scikit-learn, Classification, model evaluation, Text-to-SQL, ChromaDB and LLM-powered application development. Built Student Performance RAG Chatbot, Text-to-SQL Project, applying Python and practical development techniques to real-world problems. Experience includes python, sql, vector databases, rag, data preprocessing through project work and internship experience. Seeking an entry-level opportunity to contribute to python, sql, vector databases, rag.

## SKILLS

---

**Programming:** Python, SQL

**Libraries / Frameworks:** Pandas, Scikit-learn, Streamlit

**AI / Machine Learning:** RAG, Embeddings, Generative AI, Ollama, Classification

**Databases:** SQLite, SQL, ChromaDB

**APIs / Integration:** Google Gemini API, API integration, Requests

**Languages:** English, Telugu, Hindi, Tamil

## PROJECTS

---

### Student Performance RAG Chatbot

- Built a local RAG chatbot over 6,607 student records using preprocessing and searchable student profiles.
- Generated embeddings, stored 6,607 student documents in ChromaDB, and performed semantic retrieval.
- Integrated Ollama with llama3.2:3b and used Langfuse tracing, Promptfoo evaluation, and Pytest testing.

**Tech Stack:** Python, Pandas, Streamlit, Ollama, llama3.2:3b, nomic-embed-text, ChromaDB, Langfuse

**Project Link:** <https://github.com/thummalapalliharsha/student-performance-rag>

### Text-to-SQL Project

- Built a Python workflow that converts natural-language questions into SQLite-compatible SQL queries.
- Integrated a Gemini REST API with an OpenAI-compatible fallback and executed generated SQL against a customers/orders database.
- Implemented structured API payloads, code-fence removal, first-statement handling, and query-result return.

**Tech Stack:** Python, SQLite, SQL, Google Gemini API, OpenAI-compatible client, Requests, Python-dotenv

**Project Link:** [https://github.com/thummalapalliharsha/text\\_to\\_sql\\_project](https://github.com/thummalapalliharsha/text_to_sql_project)

## EXPERIENCE

---

### Artificial Intelligence Intern — Ediglobe (February 2024–March 2024)

- Implemented data preprocessing pipelines in Python.
- Built and evaluated classification models using Scikit-learn.
- Performed exploratory data analysis on structured datasets.

## EDUCATION

---

Bharath Institute of Higher Education and Research — B.Tech

Computer Science and Engineering (2022–2026); CGPA: 7.94

Harvest Public School — Class XII — CBSE (2022); 70.8%

Harvest Public School — Class X — CBSE (2020); 82.2%

## CERTIFICATIONS

---

- Artificial Intelligence Internship — Ediglobe (February 2024)
- AI-ML Virtual Internship — EduSkills (March 2025)
- TCS iON Career Edge – Young Professional — TCS iON (March 2025)
- Introduction to Internet of Things — NPTEL (April 2025)
